

DOWNLIGHT

7W/12W/15W/25W

○ White ● Black

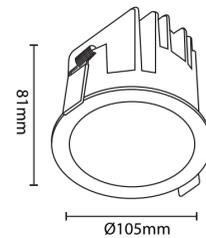

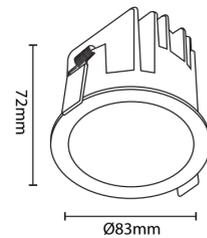

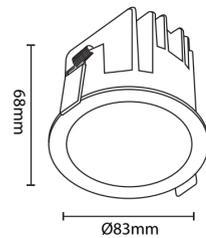

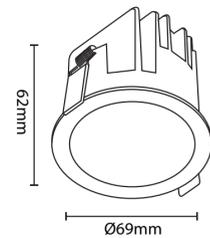

KEY ADVANTAGES

1. Using high-quality LED chips with a high color rendering index and high brightness.
2. Paired with LED flicker-free isolation driver, employing the stable solution, high-quality electrolytic capacitor, surge protection resistor, and an all-copper wire transformer. It features over-current, overvoltage, and out short circuit protection functions.
3. Alu housing for durable and better heat dissipation
